

RENAN MISCHIATTI

PHP Software Engineer | Backend & Full Stack Developer

renanmisch.dev@gmail.com | linkedin.com/in/renan-mischiatti | github.com/RenanMischiatti | São José dos Campos, Brazil |
Advanced English (B2)

PROFESSIONAL SUMMARY

PHP Software Engineer with 4+ years of experience in Full Stack development, specializing in PHP/Laravel, REST APIs, scalable system architecture, and complex integrations for e-commerce and ERP platforms. Proven track record of technical leadership: reduced critical system response times by up to 30% and accelerated delivery cycles by 20%. Highly autonomous professional with direct client communication, international remote work experience (Portugal), and hands-on AI integration for process automation and operational efficiency.

TECHNICAL SKILLS

Backend: PHP 8+, Laravel, Swoole, Hyperf, Symfony, Advanced OOP, PSRs, SOLID, Clean Code, Design Patterns
Frontend: Vue.js, JavaScript, jQuery, HTML5, CSS3, Bootstrap, AJAX
Databases: MySQL (query optimization, stored procedures, triggers), Redis
Infrastructure: Docker, Linux/VPS, AWS (S3), Git, GitHub, Bitbucket, cPanel
E-commerce Platforms: Shopify, Magento, WooCommerce, Saleor, PrestaShop, WordPress
APIs & Integrations: REST, GraphQL, NF-e, Payment Gateways (Stripe-compatible), OpenAI API
Automation & AI: Python, FFmpeg, yt-dlp, OpenAI API, async processing
Project Management: Jira, Kanban, Git Flow, Code Review, Effort Estimation, Stakeholder Communication

PROFESSIONAL EXPERIENCE

PHP Software Engineer

Alfasoft | Lisbon, Portugal — Remote | Jan 2024 – Present

- Led end-to-end development lifecycle of multiple concurrent projects in PHP/Laravel—from architecture definition to production deployment—serving 10,000+ active users.
- Engineered payment integrations in production environments, ensuring transaction security, traceability, and uptime reliability.
- Built custom plugins for e-commerce platforms (Magento, WooCommerce, Shopify, Saleor, PrestaShop) with integrations to third-party APIs.
- Owned code review process and Pull Request approvals, establishing quality standards and enforcing best practices across the team.
- Diagnosed and resolved complex production issues, improving system stability and reducing recurring failure rates.
- Integrated AI tooling into the development workflow, significantly shortening feature delivery cycles and increasing concurrent project capacity.
- Acted as primary technical contact with clients and stakeholders, conducting requirements gathering, scope definition, and effort estimation.

Stack: PHP, Laravel, Vue.js, JavaScript, MySQL, Docker, Linux/VPS, AWS S3, WordPress, Magento, Shopify, Saleor, REST APIs, GraphQL, Git

PHP/Laravel Software Developer

Voch Tech | São José dos Campos, SP — On-site | Nov 2022 – Dec 2023

- Developed and evolved a robust ERP system with complex business logic: tax modules (NF-e), product management, and internal process automation.
- Reduced application response time by up to 30% through MySQL query optimization (stored procedures, triggers) and structural refactoring of critical modules.
- Integrated external APIs and implemented asynchronous processing pipelines for high-volume data workloads.
- Refactored legacy codebase applying Clean Code and Design Patterns principles, reducing cyclomatic complexity and improving maintainability.
- Participated in architectural decisions, contributing to long-term scalability and software sustainability.
- Evolved front-end interfaces (Vue.js) with UI/UX improvements, increasing system usability and user efficiency.

Stack: PHP, Laravel, JavaScript, jQuery, Vue.js, MySQL, Docker, Linux, AWS S3, Jira, Kanban

PHP Software Developer — Intern

Drops Buffet | São José dos Campos, SP — Hybrid | Jun 2022 – Oct 2022

- Developed features for business management systems (ERP) using PHP/Laravel, JavaScript, jQuery, HTML and CSS.
- Modeled and maintained MySQL databases, ensuring referential integrity and query efficiency.

Stack: PHP, Laravel, JavaScript, jQuery, HTML, CSS, MySQL, GitHub

KEY PROJECTS

Clipo — AI-Powered Video Clipping Automation Platform | Completed

- Automation platform for generating clips from podcasts and long-form videos, designed for scalability and low per-unit processing cost.
- Laravel backend orchestrating asynchronous processing pipelines; video ingestion via yt-dlp; editing and transcoding via FFmpeg.
- Python intelligence layer for audio/video analysis; OpenAI API integration for contextual analysis and automated cut-point decision-making.

Stack: Laravel, PHP, Python, FFmpeg, yt-dlp, OpenAI API, Docker, AWS, Linux

Monetrize — Business Management Platform for Freelancers | In development

- ERP-grade SaaS platform for independent professionals featuring complex business rules, AI integrations, and focus on performance and scalable architecture.

Stack: PHP, Laravel, MySQL, OpenAI API, Docker

HighFIT AI — Personalized Diet & Workout Plan Generator | Completed

- Intelligent questionnaire system delivering 100% personalized PDF plans for diet and fitness training generated via AI based on user profile and goals.

Stack: PHP, Laravel, OpenAI API, PDF generation

AI-Powered Affiliate Marketing Automation | Completed

- Automated product curation and publishing system for affiliate programs (AliExpress, Shopee) with AI-driven product selection and ad copywriting.

Stack: PHP, Laravel, Python, OpenAI API, E-commerce APIs

EDUCATION

Bachelor of Science in Computer Science

Universidade Anhembi Morumbi | Feb 2022 – Feb 2025
